

How well do you know your Imaging Core Lab?

Seven questions to ask your Imaging Core Lab.

- 1 What is your Imaging Core Lab's greatest strength?
- 2 How many times has your Imaging Core Lab been audited by the FDA, and why?
- 3 Does your Imaging Core Lab have the ability to receive and process image data globally?
- 4 How does your Imaging Core Lab ensure the best experts available are performing your independent read?
- 5 Can your Imaging Core Lab integrate imaging data with eClinical solutions?
- 6 How does your Imaging Core Lab ensure the highest level of image quality?
- 7 Does your Imaging Core Lab have a history of strong financial stability?

BioClinica has the answers. Make your next trial a success.

1 What is your Imaging Core Lab's greatest strength?

As the world's leading independent Imaging Core Lab, BioClinica has delivered superior medical image management solutions for over 20 years. Our high level of service, dedication to efficient processes and trusted network of scientific experts have helped us complete over 2,000 successful trials to date. We have developed numerous Imaging Core Lab processes that have been accepted, reviewed and recommended by the FDA. With such rich experience, it's no wonder our client retention rate is at an industry-leading 90%.

🔗 **BioClinica Advantage: No one has more experience.**

2 How many times has your Imaging Core Lab been audited by the FDA, and why?

Based on the large number of clinical trials and FDA submissions, BioClinica is proud to have successfully completed fourteen not-for-cause, study-specific audits — with no 483s and no findings.

🔗 **BioClinica Advantage: We have received full FDA approval of our processes and SOPs.**

3 Does your Imaging Core Lab have the ability to receive and process image data globally?

BioClinica has over 500 employees currently managing more than 11,000 sites from our fully operational, on-site facilities located in the United States and Europe. It's this physical presence around the globe that enables us to manage even the largest influx of images and aggressive study timelines, regardless of location.

🔗 **BioClinica Advantage: Our global core labs deliver increased site compliance.**

4 How does your Imaging Core Lab ensure the best experts available are performing your independent read?

BioClinica assigns specialty teams of board-certified radiologists that are the best match for your trial's therapeutic indication — not just the next available “general” radiologist. For example, if you're performing a breast cancer trial, we'll assign you a radiologist(s) with extensive experience in understanding and reading breast cancer images.

🔗 **BioClinica Advantage: We provide the highest quality independent read results.**

5 Can your Imaging Core Lab integrate imaging data with eClinical solutions?

In addition to our medical image management solutions, BioClinica also offers a suite of eClinical solutions, from EDC to data management, to help run your trial with greater efficiency. If you choose to use both imaging and eClinical solutions, we can fully integrate all your reports to keep your clinical and imaging data connected and easily available. We also offer Real-Time Analytics that enable you to visualize your metrics and milestones in real time, and get greater transparency on study progress.

🔗 **BioClinica Advantage: You can manage your trial with greater efficiency, quality and improved data visibility.**

6 How does your Imaging Core Lab ensure the highest level of image quality?

BioClinica's unique Quality Control approach is designed to increase efficiencies, identify potential patient data problems and decrease the number of queries in your trial. Our multi-step process includes image verification, identification and correct image acquisition evaluated by a certified radiologic technologist.

🔗 **BioClinica Advantage: Our processes ensure maximum quality from the image data.**

7 Does your Imaging Core Lab have a history of strong financial stability?

Unlike other companies who may come and go, you can trust BioClinica to be here for the length of your trial — and beyond. As an independent public company, all of our financials and business segments are of public record. We're led by an established management team that has been in place for over 10 years. Our solid balance sheet is a testament to our ability to adapt quickly in this changing environment.

🔗 **BioClinica Advantage: We'll be here for you before, during and at the end of your trial.**
