

Real-Time Analytics Keep Studies On Track

TranSenda's CTM Dashboard gives you the insight you need to assume greater control of your studies. As a component of TranSenda's Clinical Trial Manager™, the Dashboard aggregates real-time study data into intuitive views of the most essential performance metrics for sites and studies.

CTM Dashboard lets you view the actual progress and milestones of every study and site—alongside your projections—so you're the first to know if a study or site is falling behind. Intuitive access to such meaningful data allows proactive controls throughout study performance. For example, if an entire study is lagging, the CFO can forecast the delay's impact on the overall budget.

The result is the business agility entrepreneurial sponsors, CROs and blended organizations need to stay competitive. Best of all, the data driving TranSenda's dashboard is provided by Clinical Trial Manager—extending the value of the industry's most agile and affordable clinical trial performance system.

Benefits

- Quickly review** essential performance metrics by study and/or site breakdown
- Monitor your study's **actual progress against projections**
- Control risk** by predicting, assessing and avoiding delays and costs
- Assess your best performing sites** to support future study decisions

Features

- Essential view of study-by-study actual vs. projected accrual metrics, subject accrual performance and study milestones
- Intuitive overview of specific site metrics across all sites for a single study, including site status pie chart, site list table and subject enrollment status
- CTMS integration extends user permissions through Dashboard, ensuring users only access relevant study and site data

The screenshot displays the TranSenda CTM Dashboard interface. At the top, there are navigation tabs for Portal, Dashboard, CTMS, and Payments. The main content area is titled "All Sites View - Single Study" and includes a "Welcome, Justin Hunt" message and a "Select Study No." dropdown menu set to "BV10072".

Key sections include:

- Study Information:** A table listing details for study BV10072, including its short name (VT5004 Phs2 High LDL), registration number (100,123), test article (VT5004), study type (Phase 2), and status (Active).
- Subject Screening and Enrollment:** A summary of screening metrics, including total subjects screened, screen failures, total subjects enrolled, and enrollment target.
- Site Status:** A pie chart showing the distribution of site statuses: Open (38% (5)), Active (22% (3)), Evaluation (23% (3)), Start-up (8% (1)), and Terminated (8% (1)).
- Site Information:** A table listing various sites with columns for Site No., Site Name, Investigator, Site Status, Pending Docs, Subjects Screened, Screen Failures, Subjects Enrolled, NAEs, Protocol Deviations, Major Deviations, and Open Action Items.
