

# OnPoint Clinical Payment Manager™

## Key Benefits

- Improve productivity by fully leveraging Microsoft Office, including: Access, Excel, Outlook and Word in concert with Office-Smart Clinical Payment Manager
- Reduce errors by ensuring payments are tied to study specific payment rules and verifiable clinical activity
- A simplified user experience that integrates the familiar Microsoft Office environment with the payment solution built specifically for clinical trials
- Eliminate the frustration and inefficiency from disconnected financial systems by using clinical payment software that connects people and data in ways that are Office-Smart
- A single Office-centric source for critical study payment data and documents greatly simplifies the payment process and enables you to take control of your clinical budget
- Streamlines clinical site payments by using achieved clinical milestones to generate and track payment requests
- Reduces the time required to produce a real-time view of payment status, included current accrued payments due
- Timely reports ensure investigative grants are paid on time and in the correct amounts
- Connecting Clinical Payment Manager to Microsoft Office SharePoint services makes insightful metadata available for configurable dashboards, reports, workflow and more

## Reduce payment processing time by more than 50%

For clinical trial finance professionals who want their financial software to work with their study software and their Microsoft® Office software, BioClinica delivers the first and only Office-Smart payment solution. Unlike other clinical trial payment systems, which function outside of Office software, BioClinica's OnPoint Clinical Payment Manager is designed to take full advantage of the powerful Microsoft Office system.

With BioClinica's Office-Smart technology, relevant data such as subject activities and milestones captured in Excel spreadsheets can be automatically tagged and translated into invoice line items according to established payment rules. Actual payments due can be calculated based on negotiated contracts and verifiable clinical activity. With OnPoint Clinical Payment Manager you can achieve full insight into what's been paid, what is owed, and what is projected for a specific time — enabling you to manage and control your clinical budgets. Insight into financial status includes always knowing accrued totals in real-time for the current payment period.

## Turn the investigative grant payment process into a profit center

Most financial systems don't have the functions or the flexibility needed to efficiently track payments specific to clinical trials. Manual payment calculation can involve extensive sorting through trial activity and contracts — a process that takes time, limits visibility, and is often prone to error. It also results in the number one complaint of investigators — a lack of timely and accurate payments. Offered as both a standalone system or fully integrated with BioClinica's OnPoint CTMS, Clinical Payment Manager will leverage your Office investments to maximize efficiency. An Office-Smart clinical payment solution can turn your payment process into a source of profit instead of frustration.

Invoice No.	Estimated Inv. No.	Inv. Status	Study ID	Payee Name	Service Date	Due Date	Committed Amount	Check No.	Check Date	Check Amount
INV-0001		Paid	SDH-005	Acme IBS	24Dec2008	23Jan2009	50,000.00	24245	23Dec2008	50,000.00

INV-0006		Due	SDH-005	University Medical Center (US)	28Jan2009	05Jun2011	15,177.00			6.00
Total for all pages:							328,525.00			303,547.00

Manage the status of all invoices in your study from a single, intuitive interface.

## Key Features

- Flexible study budgeting includes multiple contract version tracking, allowing study specific payment rules methodology to apply on a site-specific basis
- Unique payment programs can be designed for each service provider and investigative site
- Ability to handle multiple payee types, including: investigators, contractors, vendors, and ad hoc
- Track payments made to date including accrued, in real-time against total study budget at study, site and subject levels
- Actual payments due, calculated on subject activities and milestones, can also be captured in Excel and automatically translated into invoice line items per payment rules
- Supports currency exchange rate calculations for international sites
- Payment details help ensure compliance with Sarbanes-Oxley and support emerging investigator payment laws
- Microsoft SharePoint services 2010 capabilities include fully encrypted Single Sign-On access, permission-based portal collaboration, basic document management, and search through document titles and metadata
- Flexible Microsoft SharePoint dashboard technology enables the display of secure real-time data in a wide variety of configurable formats, on a need to know basis
- Patent-pending data interchange technology provides multiple options for connecting to third-party applications such as accounting systems and EDC
- Offered standalone or fully integrated with BioClinica's proven OnPoint CTMS

## BioClinica Technology Overview

### Connectivity

BioClinica's patent-pending data interchange technology enables the exchange and presentation of operational data from multiple systems to internal and external users in real-time. The unique approach to clinical system integration facilitates integration for legacy and enterprise applications. Interoperability is further enhanced by a standards-based architecture which supports XML-based conventions and CDISC standards.

### Hosting services

For organizations who desire to minimize infrastructure investment, BioClinica offers OnPoint hosting in our state-of-the-art facilities to ensure optimal scalability, security, reliability, and performance for your CTMS implementation.

### NATIVE SUPPORT FOR AN INTEGRATED PLATFORM

With Microsoft .NET technology BioClinica's Office-Smart solutions are web-enabled by design. The foundation of Windows Server 2008 R2, SQL Server 2008 R2, and SharePoint 2010 meets the needs of the most demanding mission-critical applications and supports enhanced virtualization designs. If your IT infrastructure is on an earlier 64-bit system such as Microsoft 2003, the move to OnPoint delivers increased levels of availability and performance, with data protection that ensures regulatory compliance. OnPoint is integrated with Microsoft SharePoint services that leverage the advanced features offered via Microsoft Office applications. BioClinica OnPoint software fully supports compliance requirements for the US 21 CFR Part 11 Regulation.

### TECHNOLOGY COMPATIBILITY

OnPoint is compatible with:

- Windows 2008 Server R2
- SQL Server 2008 R2
- SharePoint Server 2010
- 64-bit Operating Systems

## About BioClinica

BioClinica, Inc. is a **leading global provider** of integrated, technology-enhanced clinical trial solutions. BioClinica supports pharmaceutical and medical device innovation with:

- Medical image management
- Electronic data capture
- Interactive web and voice response
- Clinical supply chain forecasting
- Clinical Trial Management

BioClinica services maximize efficiency and manageability throughout **all phases of the clinical trial process**. With more than 2,000 successful trials to date, BioClinica has supported the clinical development of many new products from early phase trials through final approval. BioClinica operates **state-of-the-art** imaging core labs on two continents, and supports worldwide eClinical and data management services from offices in the United States and Europe.
