

UK MODERN SLAVERY ACT STATEMENT

BioClinica, Inc. and its affiliates (“BioClinica”) recognize that slavery and human trafficking are egregious crimes and that steps must be taken to eliminate the threat it poses to society. Accordingly, BioClinica is committed to preventing slavery and human trafficking within our organization.

OUR BUSINESS

Clinical trials are complex undertakings. BioClinica supports the performance of clinical trials by providing comprehensive professional services and multifaceted technologies to pharmaceutical, biotechnology, medical device and contract research organizations through a network of offices and research (investigator) sites in the United States, Europe, Asia, and Latin America.

OUR POLICIES AND PROCEDURES

Our commitment to ensuring the absence of slavery or human trafficking in our business and supply chain is reflected in BioClinica’s Code of Business Conduct and Ethics (the “Code”) and our Standard Operating Procedures (“SOPs”). The Code requires our employees to maintain certain ethical standards in all business relationships. All BioClinica employees are required to review and agree to abide by the Code and the SOPs applicable to their position. They may access and review our Code and SOPs via our internal systems at any time. All of our directors, officers and employees must comply with all applicable laws.

BUSINESS PARTNERS AND SUPPLY CHAINS

BioClinica does not knowingly support or deal with any business that is involved in modern slavery or human trafficking. BioClinica and a vast majority of our customers are engaged in performing clinical trials, which is a heavily regulated business activity. Based on the nature of our services and the customers we support each day, BioClinica believes the risk of slavery or human trafficking in its business and supply chain to be low.

BioClinica often is subject to mandatory audits and inspections by regulatory authorities and its customers, ensuring BioClinica’s services are performed in a lawful manner and in accordance with our SOPs (including those relating to the education, experience, qualifications, and training of BioClinica’s employees). BioClinica also adheres to industry adopted principles outlined in the 2015 Pharmaceutical Supply Chain Initiative, which specifically addresses forced labor and child labor. Additionally, BioClinica’s customer and supplier contracts generally include provisions obligating the parties to adhere to all applicable laws. In the event BioClinica identifies critical non-conformance issues, and the customer or supplier fails to adequately remediate such issues in a timely manner, the relationship would be re-evaluated and, if appropriate, terminated.

NEXT STEPS

BioClinica intends to develop a specific policy, to be included in our Code, that directly addresses modern slavery and human trafficking. BioClinica also intends to conduct risk assessments to determine which segments of our business and which of our suppliers may be most at risk of slavery or human trafficking.

This statement is made pursuant to Section 54(1) of the Modern Slavery Act of 2015, and constitutes BioClinica's anti-slavery and human trafficking statement for the financial year ending on December 31, 2016.
