**WORKING RANGE**

Table 3: Extrapolation of the Lower Limit of Quantitation (LLOQ).

**STABILITY**

Table 4: Summary of the absolute and relative stability.

**CONCLUSION**

The three assays (ADX01, A01, A02) for Tau meet the inter-laboratory criteria in our laboratory for clinical sample testing. A rough estimate: more detailed analysis should be done in our laboratory, the sample is fully compliant with the fit-for-purpose application in clinical trials.
